To Whom It May Concern:

This is to certify that Lumen Polska Sp. z o.o. having their office at 42-46 Długosza, 51-162 Wrocław, were awarded a turn-key contract in execution of the electrical installations works on UPM Raflatac Wrocław Factory project in Biskupice Podgórze.

Scope of works:

- transformer station 11 MVA
- temporary transformer station 630 kVA
- temporary power supply of building site
- medium voltage cable lines feeding transformer stations
- installation of busbar trunking system in transformer station
- installation of electrical switchgears
- installation of trays and support construction for power cables
- installation of power 0,4 kV
- installation of sockets 230 V
- installation of UPS
- installation of basic lighting
- installation of emergency lighting
- lightning conductor
- earthing
- outside lighting.

A lot of works were executed with scissor lifts 12 meters above the ground level inside the factory. The works were executed between March and October 2008.

We were satisfied with their support and performance on a large, complex and challenging project.

Wishing them the very best for their future projects.

Mika Leppänen
Project Manager
LEMCON Polska Sp. z o.o.
